

# C300H BATH LIFT HYDRAULIC

The lifts are designed for a safe bath people with disabilities in the bathtub. Devices facilitate and improve the care of people who require care. The lifts have a function of height adjustment and ability of, full range of rotation with blockade. Solid construction, durable materials and construction coatings guarantee trouble-free operation.

The device has been registered in the Patent Office of the Republic of Poland and in the Office for Harmonization in the Internal Market (OHIM), is also entered to the medical device database.

C300H

C300H

Vertical movement enabling raising or lowering the patient, is obtained by pulsating pedal pressing at the bottom of the lifting column.

Rotational movement around the axis of the column, allowing for the correct positioning of the seat is obtained by pulling out the rotation lock knob located on top of the pivot arm above the column.

The side backrests of the seat are tiltable.

The device can be attached to the floor along the longer side of the bathtub, with expansion bolts.

#### Technical data:

Max height up to the chair base	623 mm
Min. height to chair base	198 mm
Seat height adjustment range	425 mm
Seat width	425 mm
Load capacity	130 kg

The lift is designed to work at the bathtub, it is made entirely of moisture resistant material (stainless steel, plastic).

# C223 EVO SHOWER SEAT

Shower seat with a unique, anatomical shape and extremely pleasant to the touch, flexible seat. This seat allows for a comfortable bath in the shower, provides support during rest. The seat also allows easier hygiene of intimate places - the right shape of the seat with the cut-out at the front.

C223 EVO

The device has been registered in the Patent Office of the Republic of Poland and in the Office for Harmonization in the Internal Market (OHIM), is also entered to the medical device database.

C223 A EVO

The construction and wall mounting part are made of stainless steel, while the seat is made of flexible plastic, which is easily subjected to pressure. The seat can be folded to the wall. The shower seat can be used both at home and in health care units and public institutions.

The seat with a specially designed cut-out makes hygiene easier. It is especially useful for the elderly and people with disabilities with paresis of limbs.
